## Price to Sell

---

A few numbers shape your whole sale. Getting them right from the start protects your bottom line and your timeline.

- **List price**

Price it right from day one. Homes priced to the market sell faster — and often for more — than overpriced ones.

- **Your net proceeds**

What you actually walk away with after the mortgage payoff, commissions, and closing costs. We map this out early.

- **Seller closing costs**

Usually a few percent of the sale price (title, taxes, and fees). We'll give you a clear estimate up front.

- **Prep & repairs**

A small, strategic budget for cleaning, paint, and quick fixes often returns more than it costs at sale.

- **Showings & timing**

Flexibility for showings and a smart launch window help your home sell faster and stronger.

## Avoid These Common Mistakes

---

- Overpricing to “leave room” — it usually means more days on market and a lower final price.
- Skipping prep and pro photos — most buyers fall in love online before they ever walk in.
- Letting clutter or small repairs distract from your home's best features.
- Turning down showings or being inflexible on timing.
- Going it alone — pricing, marketing, and negotiation are exactly what we're here for.
